Technical Consulting

MEDITECH Expertise on Demand

The Right Technical Resources, When You Need Them

Different projects require different skill sets. It's not always practical to maintain diverse, specialized technology expertise on staff. When it comes to assessing, implementing, or optimizing MEDITECH platforms, Park Place can provide the knowledge you need to keep your project on track. Many MEDITECH customers rely on the unique perspective, resulting from deep experience designing, operating, and maintaining systems, that we bring to each engagement.

Park Place International's pool of talented technical experts specialize in helping our customers achieve operational sustainability for MEDITECH . Our Consultants have extensive hands-on MEDITECH design, implementation, and support experience. In addition, they maintain technical certifications across a range of partners and technologies, including BridgeHead, Cisco, Citrix, Dell, EMC, HP, IBM, Microsoft, NetApp, and VMware. This combination of real-world MEDITECH experience and technical expertise results in individuals who have a unique understanding of MEDITECH and enterprise environments.

Customized Solutions to Meet Your Needs

Our Technical Consultants take the time to understand your organization's needs and what you are trying to accomplish. Our services are built around the unique attributes of your organization to provide real value as you work toward operational sustainability.

Park Place Technical Consultants specialize in helping MEDITECH Hospitals with:

- MEDITECH Infrastructure Validation
- Strategic IT Technology Planning
- MEDITECH Platform Migrations
- MEDITECH and Enterprise Virtualization Strategies
- Network Infrastructure
- Backup and Recovery, including ISB, IDR, MBI, MBF
- Disaster Recovery
- Network and Systems Security and Compliance
- Virtual Desktop Infrastructure (VDI)
- Performance Remediation & Intervention

PARK PLACE
INTERNATIONAL

Our People Make the Difference

Park Place's team of Technology Consultants bring extensive experience working in MEDITECH hospital data centers. In addition, they maintain technical certifications across a range of partners and technologies, including BridgeHead, Cisco, Citrix, EMC, HP, IBM, Microsoft, NetApp, and VMware. This combination of real-world MEDITECH experience and technical expertise results in individuals who have a unique understanding of MEDITECH and enterprise environments.

When on-site, our Consultants become part of your team, sharing in your goals and helping you achieve your vision. Many of our clients look at our Consultants as an extension of their own team.

Park Place continually invests in our technical teams to ensure they are experienced and trained in the latest technologies. We engage with our Partners and MEDITECH to participate in testing and development efforts, and have access to specialized, top-level technical resources for each MEDITECH-certified technology.

Choices

In technology, there's often more than one way to solve a problem or build a solution. Park Place works with you to determine technology choices that make sense, and can provide insight and recommendations based on experience.

It's our practice to enable hospitals to explore technology directions before making a decision, rather than limiting you to a rigid set of recommendations. We help you weigh the pros and cons and evaluate influencing factors to arrive at a solution that is sustainable for your organization.

Project Deliverables

Park Place's Technology Consultants provide thorough documentation of each project to provide a comprehensive report of the state and topology of your environment, options and recommendations, and specific changes or actions performed/suggested.

Our written documentation enables customers to thoroughly understand the state of their environment for the effective management and maintenance of the platform.

Consulting Portfolio

Our team of experts delivers the following Consulting Services across a range of technology areas:

- Assessments
- Strategic Planning
- Optimization
- Remediation
- (Interim) Management/Technology Residency
- Technical Program Management
- Project Engineering
